<i>Food safetypolice</i>		

Management of the Clinical Center of Banja Luka and all employees are committed to meet the requirements and improving the effectiveness of food security management system in accordance with ISO 22000:2005.

We are determined to establish a system for food safety to ensure that the food we are providing to our patients is safe to use and is of the required quality.

Food security policy of the Clinical Center of Banja Luka is reflected in:

- respect and adequate implementation of the ISO 22000 requests, with the intent to achieve the highest possible level in this area.
- Continuous development and implementation of food safety management system and improving its effectiveness.
- Forming business aims to support food safety.
- Compliance with the requirements of regulations and regulatory documents, as well as mutually agreed requirements of the customers relating to food safety.
- Ensuring that our suppliers accept the same obligations in terms of quality and food safety.
- Continuous review of safety management systems food in order to determine opportunities for improvement and the need for modifications in order to increase the satisfaction of our customers.

As general manager of the Clinical Center of Banja Luka, I commit myself to respect the content of "Food safety policies". Responsibility for the successful implementation of this program is on every employee in the CC of Banja Luka, in all levels and functions.
